Seeking a 6-month end-of-studies internship (PFE) starting February 2027 | Open to relocation (Munich/Berlin)

Summary

Final-year Software Engineering student (INSAT, expected graduation September 2027) building production AI systems that turn unstructured documents into context LLMs and **AI agents** can act on: bilingual RAG chatbots, LLM-backed contract review for enterprise clients, and multi-agent incident diagnosis. Hands-on across document ingestion, embeddings and vector retrieval, agent orchestration (LangChain/LangGraph) and LLM evaluation, backed by the backend and platform engineering (FastAPI, Express.js, Docker, Kubernetes, CI/CD) needed to run multi-tenant AI products reliably.

Experience

AI Engineer Intern – Applicare, Canada Jun 2026 – Aug 2026
- Architected AskSahera, a bilingual (FR/EN) production **RAG** chatbot grounding answers in ∼100 source documents
- Developed a dual-source **document ingestion** pipeline (PubMed XML + GROBID PDF parsing) with IMRAD-aware chunking and a sliding-window fallback, turning unstructured documents into structured context
- Built the RAG backend in Express.js with Qdrant vector storage and OpenAI embeddings, using Claude for generation; integrated Cloudflare R2 for object storage

Mazdev – Tunis
Software Engineer Intern Jul 2025 – Sep 2025
- Engineered a production chatbot platform configured in YAML, letting non-technical users create 20+ bot variants without code
- Created a RAG engine (Pinecone) reaching 94% semantic accuracy across a large document set; optimized embeddings to cut latency 45%
- Established an automated testing framework, cutting the QA cycle 50%

Fullstack Developer Mar 2025 – Jun 2025
- Architected an AI-powered legal contract review platform for 40+ **enterprise** clients, cutting analysis time 60%
- Delivered a React/Next.js + FastAPI RESTful API system processing 500+ contract reviews per month at production scale
- Implemented a Docker CI/CD pipeline, cutting infra setup time 75%

Frontend Developer Intern – Steros, Sfax Jul 2024 – Aug 2024
- Built a responsive showcase website and interactive UI components, with a PHP/MySQL backend

Projects

KubeMind: AI-Driven Kubernetes Observability Platform (3-person capstone team) GitHub
- Designed a 5-layer agentic architecture (ingestion, AI agents, correlation/storage, presentation) for automated incident diagnosis
- Implemented 3 specialized **LangGraph** agents (logs, metrics, events) orchestrated via a StateGraph workflow, feeding a correlation agent that links their findings into one diagnosis
- Developed a FastAPI backend and Next.js dashboard on a real-time ingestion pipeline (Prometheus, Loki, Kafka, MongoDB)
- Benchmarked output quality across 3 LLM providers (OpenAI, Gemini, Ollama) across 3 controlled incident scenarios

Multi-Tenant AI Chatbot Widget GitHub
- Designed a reusable, embeddable AI chatbot component for **multi-tenant** deployment across client websites via a single `<script>` tag
- Enforced Shadow DOM isolation and strict domain validation for secure tenant isolation
- Integrated the backend with Hono, Supabase, and Upstash Redis; deployed on Railway and Cloudflare Pages

Education

INSAT – National Institute of Applied Sciences and Technology Sep 2022 – Sep 2027 (expected)
Engineering Degree in Software Engineering (EQF Level 7 / Master's equivalent)

Skills

AI/ML: LLM Integration, RAG, LangChain, LangGraph, Vector Databases (Qdrant, Pinecone), Embeddings, Prompt Engineering
Languages: Python, TypeScript, JavaScript, Java, C#, PHP, SQL
Backend: FastAPI (Python), Express.js (JavaScript), Hono (TypeScript), NestJS (JavaScript), ASP.NET Core (C#)
DevOps & Cloud: Docker, Kubernetes, GitHub Actions, CI/CD, Vercel, Railway, Cloudflare (Pages, R2)
Data & Observability: MongoDB, MySQL, Supabase, Redis (Upstash), Prometheus, Loki, Kafka
Frontend: React, Next.js, Vue
Tools: Git, Linux

Activities

Event Mission Leader – Junior Enterprise INSAT 2024 – 2025
- Supervised a ∼40-member team over the 2024–2025 mandate, leading the organizing committee for 2 flagship events, including Forum INSAT Entreprise (1,500+ attendees, 40+ companies)

Operations Manager – WinterCup 7.0 2025
- Owned end-to-end logistics and event planning for WinterCup 7.0, an overnight coding contest with ∼300 participants, coordinating the on-site operations staff under time pressure
